

SUSY searches in Vector Boson Topology review and mu+VBF trigger performance with 2017 data with the CMS experiment

Monday, 2 October 2017 15:10 (170)

We present a review of results in SUSY searches in VBF topology with 8 TeV data collected by the CMS experiment. A 13 TeV projection of this searches is presented with a report on the mu+VBF trigger performance using 2017 data collected.
