

Status of COHERENT:CsI[Na] experiment at SNS

Wednesday, 4 October 2017 15:30 (15)

The COHERENT collaboration aims to observe coherent elastic neutrino nuclear scattering (CEvNS) using several detector options including Ge, Ar, NaI and CsI[Na]. The latter has completed the first year of operation at the Spallation Neutron Source located at the Oak Ridge National Laboratory. The description and status of the CsI[Na] detector will be presented.
