

# Perspectives of DSNB neutrino researches in modern detectors

*Wednesday, 7 October 2015 14:15 (15)*

Perspectives for the studies of diffuse supernova neutrino background (DSNB) by modern underground detectors are reviewed. DSNB neutrino fluxes, their spectra and current experimental limits on their flux are discussed.

## **Presentation type**

Section talk (10+5 min)

**Primary author(s)** : Ms. BORODIKHINA, Liudmila (NRNU MEPhI, NRC Kurchatov Institute)

**Presenter(s)** : Ms. BORODIKHINA, Liudmila (NRNU MEPhI, NRC Kurchatov Institute)

**Session Classification** : Nuclear physics and particle physics - parallel VI

**Track Classification** : Nuclear physics and particle physics
