

Intercomparison of flow measurements at RHIC experiments.

Wednesday, 7 October 2015 16:15 (15)

The measurements of collective flow effects in particle production have provided invaluable insights on the transport properties of the strongly interacting matter produced in relativistic heavy-ion collisions at RHIC. The detailed comparison of flow measurements from PHENIX and STAR experiments at RHIC will be presented and discussed. The suggestions for the future measurements of flow at RHIC will be provided.

Presentation type

Section talk (10+5 min)

Primary author(s) : VDOVKINA, Svetlana (Student)

Presenter(s) : VDOVKINA, Svetlana (Student)

Session Classification : Nuclear physics and particle physics - parallel VII

Track Classification : Nuclear physics and particle physics
