

The development of cross disciplinary studies in cosmology and particle physics on the platform of a Scientific-Educational complex of Virtual Institute of Astroparticle physics (VIA)

Thursday, 8 October 2015 15:00 (10)

The overview of the main problems and methods of cosmoparticle physics, studying fundamental relationship of micro- and macro-worlds will be accompanied by the demonstration of the facility of Virtual Institute of Astroparticle physics (VIA) activity as a well proven basis for scientific collaborative work and education at distance.

Presentation type

Primary author(s) : Prof. KHLOPOV, Maxim (MEPHI/APC)

Presenter(s) : Prof. KHLOPOV, Maxim (MEPHI/APC)

Session Classification : Nuclear physics and particle physics - parallel X

Track Classification : Nuclear physics and particle physics
