DEUTERON ANALYZING POWERS A_y , A_{yy} AND A_{xx} IN dp - ELASTIC SCATTERING OBTAINED AT JINR-NUCLOTRON

Friday, 2 December 2022 11:45 (15)

The results on the the vector A_y and tensor A_{yy} and A_{xx} analyzing powers in deuteron-proton elastic scattering at large scattering angles are presented. These data were obtained at internal target at JINR Nuclotron in the energy range 400-1800 MeV using polarized deuteron beam from new polarized ion source. New data on the deuteron analyzing powers in the wide energy range demonstrate the sensitivity to the short-range spin structure of the isoscalar nucleon-nucleon correlations.
