

Estimates of the collision symmetry planes in HADES experiment at GSI

Tuesday, 11 October 2016 13:29 (21)

Estimates of the collision symmetry planes is a crucial part of the anisotropic flow analysis in heavy-ion collisions. HADES experiment at GSI has different subdetectors which can be used for symmetry plane estimates. In this presentation different methods of the event plane reconstruction and detector non-uniformity correction procedure used in HADES experiment will be discussed.

Primary author(s) : Mr. ZAYTSEV, Alexander (NRNU MEPhI)

Co-author(s) : Dr. TARANENKO, Arkadiy (MEPhI); Dr. SELYUZHENKOV, Ilya (GSI - Helmholtzzentrum für Schwerionenforschung GmbH (DE))

Presenter(s) : Mr. ZAYTSEV, Alexander (NRNU MEPhI)

Session Classification : Heavy Ion Student Session-1

Track Classification : Nuclear physics and particle physics
