

Information system for diagnosis of melanoma

Friday, 14 October 2016 09:30 (30)

1National Research Nuclear University MEPhI (Moscow Engineering Physics Institute), Russian Federation, 115409, Moscow, Kashirskoe shosse, 31 2N.N. Blokhin Russian Cancer Research Center, Russian Federation, 115478, Moscow, Kashirskoe shosse, 23 3A.I. Evdokimov Moscow State University of Medicine and Dentistry, Russian Federation, 127473, Moscow, Delegatskaya st., 20/1.

The method of creation of information system for the diagnosis of melanoma is described in the presented work. Malignant tumors are investigated at the level of macro - and microimages in combination with clinical data. The development is made with the use of MySQL. The information system is a result of joint activities of the National research nuclear University (MEPhI) and the N.N.Blokhin Russian Cancer Research Cente.

Primary author(s): Mr. SEL'CHUK, Vladimir (N.N.Blokhin Russian Cancer Research Cente, Moscow)

Co-author(s): Mr. POLYAKOV, Evgeniy (National research nuclear University "MEPhI" (Moscow Engineering Physics Institute), Moscow); Mrs. RODIONOVA, Olesya (National research nuclear University "MEPhI" (Moscow Engineering Physics Institute), Moscow); Ms. SUKHOVA, Olga (Student of NRNU MEPhI)

Presenter(s): Ms. SUKHOVA, Olga (Student of NRNU MEPhI)

Session Classification : Poster session - V

Track Classification : Methods of experimental physics
