

Linear modulators on the monitor screen

Thursday, 13 October 2016 15:15 (30)

The simulation software to research the work of the linear modulator with the discharge line on the thyatron (generator with a soft switch) is presented. In this software it is possible to configure the generator and to research the influence of the parasitic inductances and capacitances on the nanosecond pulses.

Primary author(s) : Dr. AVERYANOV, German (National Research Nuclear University (MEPhI))

Co-author(s) : Mr. KOBLYATSKIY, Andrei (National Research Nuclear University «MEPhI» (MEPhI)); Dr. DMITRIEVA, Valentina (NRNU MEPhI)

Presenter(s) : Mr. KOBLYATSKIY, Andrei (National Research Nuclear University «MEPhI» (MEPhI))

Session Classification : Poster session - IV

Track Classification : Methods of experimental physics
