

The attenuation length in the atmosphere for neutrons: new computations and applications

Thursday, 13 October 2016 15:15 (30)

Computed yield function of solar neutron telescope at Mt. Aragats, for solar neutrons is presented. The computations of cascade in the atmosphere were made by Monte Carlo using the GEANT4-based PLANETO-COSMICS tool. Recalculated attenuation length in the atmosphere for neutrons is presented.

Primary author(s) : ARTAMONOV, Anton (Space Climate Research Unit, University of Oulu, Finland)

Co-author(s) : Dr. MISHEV, Alex (ReSoLVE Center of Excellence, University of Oulu, Finland); Prof. USOSKIN, Ilya (Sodankylä Geophysical Observatory (Oulu unit), University of Oulu, Finland)

Presenter(s) : ARTAMONOV, Anton (Space Climate Research Unit, University of Oulu, Finland)

Session Classification : Poster session - IV

Track Classification : Methods of experimental physics
