In order to provide mutual understanding between experts working in various fields of science and technology an interdisciplinary glossary is being proposed. The glossary has been developed with the application of information technology. Necessary areas of information technology for understanding and cooperation of various experts have been considered. Technological solutions and their application in numerous areas of expertise are presented. The developed techniques test results are given.

Primary author(s) :   Mr. PRONICHEV, Alexandr (NRNU MEPhI); Mr. NIKITAEV, Valentin (prof)

Co-author(s) :   Mr. POLYAKOV, Evgeniy (postgreduet)

Presenter(s) :   Mr. PRONICHEV, Alexandr (NRNU MEPhI)

Session Classification :   Poster session - VI

Track Classification :   Methods of experimental physics
