

Measurement of R between 1.84 and 3.72 GeV at the KEDR detector

Monday, 10 October 2016 17:45 (15)

Using the KEDR detector at the VEPP-4M e^+e^- collider, we have measured the values of R at twenty points of the center-of-mass energy between 1.84 and 3.72 GeV. At the moment it is the most accurate measurement of R(s) in this energy range.
