i

The 2nd international conference on particle physics and astrophysics

Friday 14 October 2016

Poster session - V - Hall of the 2nd floor (09:30-10:00)

[id] title	presenter	board
[41] SiPMs based azimuthal position sensor in ANITA-IV Hi-Cal Antarctic balloon experiment	Mr. NOVIKOV, Alexander	
[140] The decision support system development for the diagnosis of stomach cancer	Mrs. KORENEVSKAYA, Polina	
[87] Investigation of the effect of artifacts in blood preparations on the result of cell classification	Mr. POLYAKOV, Evgeniy	
[158] Development of the multichannel data processing ASIC design flow	Mr. IVANOV, Pavel	
[159] Complex function block of a low-power digital peak detector with input disturbance correction	Mr. NORMANOV, Dmitry	
[156] 5 bit current steering low power DAC for threshold voltage adjustmen	Mr. SAGDIEV, Ilyas	
[150] Simulation and investigation of SiPM's surface leakage currents caused by radiation damage	Mr. PARYGIN, Pavel	
[187] Method of events selection in measurements of the reaction of stopped pion absorption	Mr. PRITULA, Roman	
[385] THE INVESTIGATION OF DIAMOND ABSORBANCE SPECTRUM DOPED WITH BORON	Ms. AKSENOVA, Anastasia Prof. SAMOSADNYI, Valery	
[100] Information system for diagnosis of melanoma	Ms. SUKHOVA, Olga	
[92] Cataract anamnesis/medical background acquisition system	Ms. KIRILLOVYKH, Ksenia	
[85] Error estimation of the blood cell nuclei optical characteristics measurement for the acute leukemia diagnostics	Mr. POLYAKOV, Evgeniy	
[84] Leukocytes segmentation methods in the images of peripheral blood and bone marrow preparations	Mr. YURY, Zakharenko	
[319] Substrate noise isolation technique for mixed-signal ASICs in particle physics instrumentation	Mr. EVGENY, Malankin	
[59] Radon concentration monitoring using xenon gamma-ray spectrometer	Ms. BYCHKOVA, Oksana	
[161] Development of the protocol of the interface of data exchange with the GBTX chip	Mr. SHUMKIN, Oleg
