Muonography on Kamenny Island in Lake Kubenskoye

Thursday, 24 October 2024 09:30 (15)

The results of a study of the territory and hidden structure of the buildings of the Spaso-Kamenny Preobrazhenskii Monastery on Kamenny Island in Lake Kubenskoye are presented. The monastery, a cultural heritage site, was founded in 1260. The main purpose of the study was the basements of a bomb exploded in the mid-1930s Preobrazhenskii Cathedral of Monastery. According to the chronicles, there may be a crypt containing the remains of the disgraced primate of the Russian Church, Metropolitan Varlaam, who died in 1533.
