$K^*-(892)$ meson production in 26.5 GeV/c K-minus-meson-N interactions at U-70 accelerator complex

Wednesday, 23 October 2024 18:50 (15)

We report measurements of A-dependence $K^*-(892)$ mesons' production in interactions of 26.5 GeV/c K-minus-meson beam and nuclei (C,Al,Cu,W) at SPASCHARM facility at U=70 accelerator complex (NRC "Kurchatov institute" - IHEP, Protvino. A-dependence of $K^*-(892)$ mesons is compared with our results on A-dependence of K_0s -mesons and with other experimental measurements.
