# URQMD implementation status

- simulation and reconstruction of events generated by URQMD is working (tested for current configuration of cave+tube+magnet+BBC geometry)
- current analysis chain including URQMD and BBC detector is distributed with docker container is posted on gitlab [https://git.jinr.ru/nica/spdroot/-/tree/feature/renewed\\_docker?ref\\_type=heads](https://git.jinr.ru/nica/spdroot/-/tree/feature/renewed_docker?ref_type=heads)
- instructions are available in the README file in the folder spdroot/docker/urqmd\_scripts
